

# Leg Installation

To install the legs, first flip the cabinet on its top and remove the 4 nuts and bolts holding the corners of the bottom panel in place.

# Leg Installation

Next slide the legs between the panels as illustrated and replace the four nuts and bolts.

# Attach Doors

With assistance lift the cabinet and restore it to an upright position and then attach the doors to the pre-installed hinge mounts.

Clip the doors to their hinge mounts.  
(See included Salice instructions for more detail)
